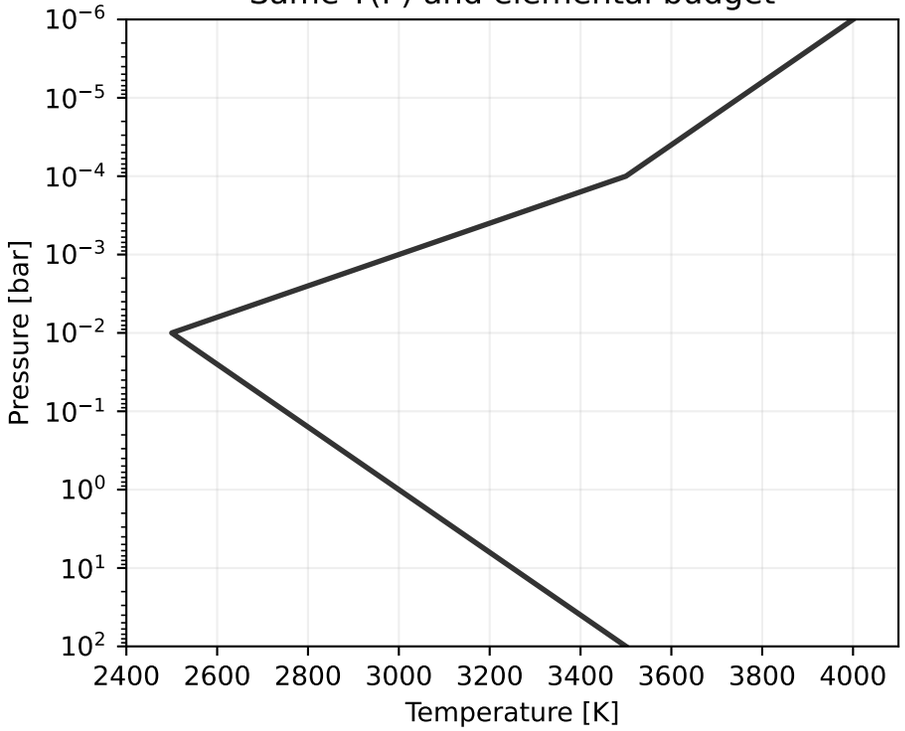
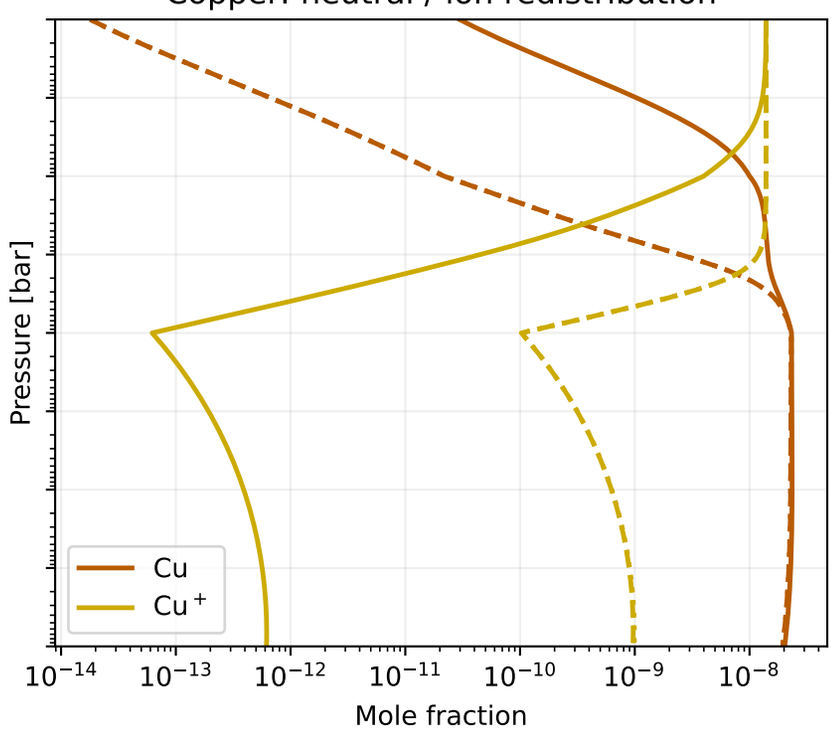
# Prescribed temperature inversion | solar composition, ideal gas only

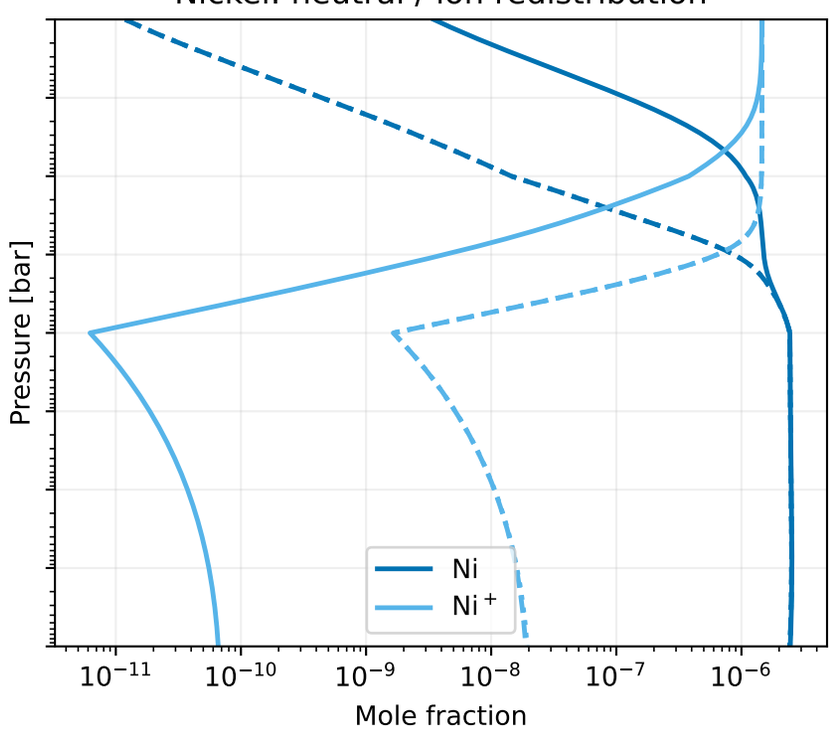
## Same T(P) and elemental budget



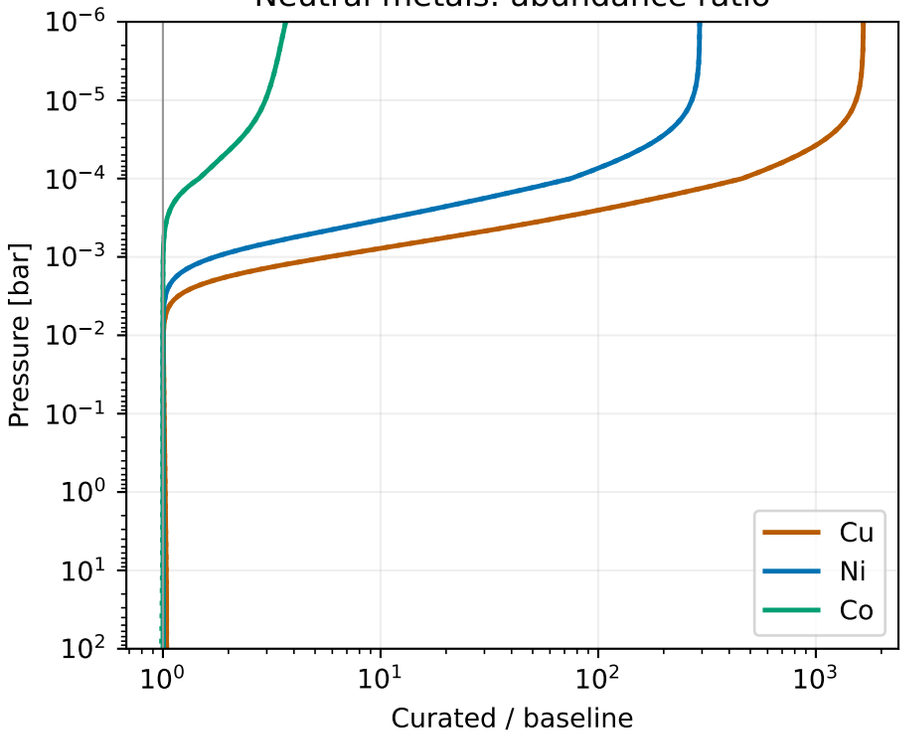
## Copper: neutral / ion redistribution



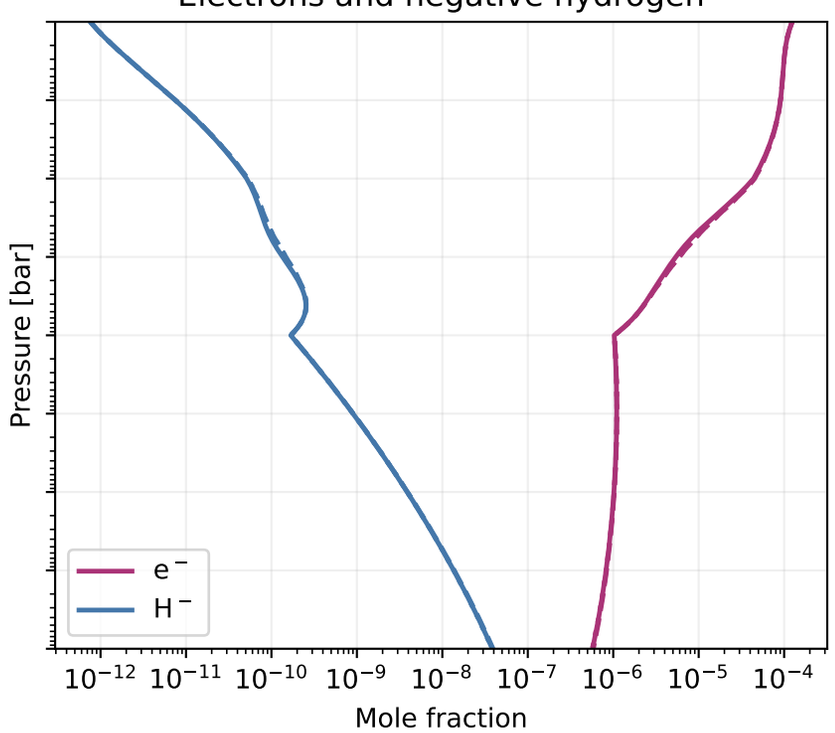
## Nickel: neutral / ion redistribution



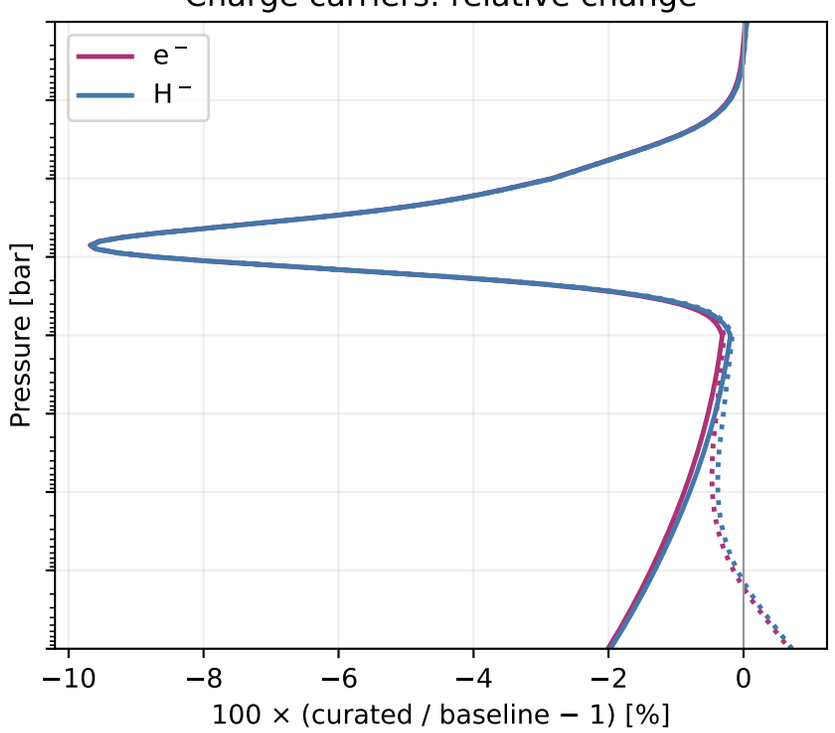
## Neutral metals: abundance ratio



## Electrons and negative hydrogen



## Charge carriers: relative change



Curated: 537 species  FastChem 4 data: same 537 species  Legacy FastChem 3 preset: 523 species

Ratio panels: solid = relative to FastChem 4; dotted = relative to FastChem 3.
Prescribed columns; no condensation, transport, photoionization, or spectral calculation.
